

FORCES

Find \vec{a} of the block.

$$f_{\text{friction}} = \mu_k N = \mu_k mg$$

$$F_{\text{net y}} = 0 = N - mg \Rightarrow N = mg$$

$$F_{\text{net x}} = ma = F - \mu_k mg$$

$$\Rightarrow a = \frac{F - \mu_k mg}{m}$$

- FBD dot
- Newton 2nd Law Assumptions

Find F so that the 2kg block does not slide on top of 5kg.

$$ma = f_s$$

$$a = \frac{f_s}{m}$$

$$Ma = F - f_s$$

$$M \left(\frac{f_s}{m} \right) = F - f_s$$

$$\frac{M}{m} f_s + f_s = F$$

$$f_s \left(\frac{M}{m} + 1 \right) = F$$

$$F = \mu_s mg \frac{M}{m} + \mu_s mg$$

$$F = \mu_s g (M + m)$$

$$(M+m)a = F$$

$$a = \frac{F}{M+m}$$

$$ma = f_s$$

$$m \frac{F}{M+m} = f_s$$

$$F = \frac{\mu_s mg}{m} (M+m) = \mu_s g (M+m)$$
